Overview

Sleek Design with Ultimate Comfort on Deck

The Galeon 620 FLY represents a bold leap forward in yacht design, embodying the Galeon shipyard's commitment to innovation and technical mastery. This upcoming model is a stunning example of cutting-edge craftsmanship, seamlessly blending sporty elegance with high-end functionality.

The 620 FLY's dynamic, two-tone exterior is a visual marvel, defined by smooth lines that sweep across its entire length. The yacht's wide beam enhances its visual impact, accentuated by large, glazed hull sides and

expansive windows that flood the main deck with natural light. The top deck features a hardtop bimini with an automated sunroof, and an optional fabric awning extends over the aft, providing ample shade for guests.

Relaxation is at the forefront with two U-shaped seating areas and a choice of free-standing sun loungers or a spacious seating zone at the stern. A redesigned wet bar and steering console elevate the impressive flybridge experience.

Galeon Yachts

Innovative Layout with Seamless Bow Access

The asymmetric layout of the main deck offers wide starboard-side access to the bow's leisure area. This space boasts split seating that easily converts into a large sunpad for sunbathing or relaxation with the middle part rotating 360°.

Innovative pantograph doors on both port and starboard sides allow seamless movement between the helm and the bow, while the center windscreen panel swivels to the side, offering an open, free-flowing connection between the saloon and front lounge area – a distinctive feature that sets the 620 FLY apart from other yachts in its class.

Expanded Cockpit with Effortless Indoor-Outdoor Flow

The cockpit is an oasis of luxury, enhanced by three partially glazed Beach Mode panels that extend the stern space by an impressive 2 meters, creating a harmonious connection between indoor and outdoor living. Sliding saloon doors and a retractable window seamlessly link the cockpit to the interior, making the transition between spaces effortless. Trendy, free-standing furniture with a

contemporary design adds lightness and flair. The starboard glass panel slides forward, transforming the area into a chic bar setting, with the top Beach Mode panel providing even more versatility. Portside, the windows tilt up, airing the interior and providing much needed shade over the owner's beach club area.

Seamless Water Access with Expansive Leisure Space

The 620 FLY redefines ease of access to the water with its innovative design. The combination of Beach Mode panels and a hydraulic aft platform creates a vast sport and leisure zone just above sea level, perfect for launching water toys. The starboard balcony, fitted with retractable cleats, is designed to accommodate dinghies and jet skis, func-

tioning as a private berth. Additionally, the portside beach platform offers direct, private access from the owner's cabin, ensuring a seamless connection to the water. The crew cabin, equipped with two berths, a kitchenette, and a bathroom, is easily accessible via the platform.

Luxurious Interior with Customizable Finishes and Seamless Flow

The interior of the 620 FLY perfectly blends luxury with functionality. The entertainment area is positioned near the cockpit for smooth transitions between indoor and outdoor spaces, while the kitchen, featuring a central island, is located next to the helm station. A variety of wood finishes and upholstery options provide ample customization to

match personal preferences. Thoughtful details such as rounded cabinetry, integrated air-conditioning vents, and ambient lighting further enhance the elegant ambiance. Designed to feel like a home away from home, the interior features cozy touches, new fabric selections, and follows the latest design trends.

Sophisticated Interior Blending Luxury and Functionality.

Below deck, the 620 FLY offers flexible accommodation options. Choose between a three-cabin layout, which expands the master stateroom, or a four-cabin version with two additional berths. Both configurations include three well-appointed bathrooms, ensuring comfort and privacy for all guests.

The Galeon 620 FLY is more than just a yacht – it's a revolution in design, offering unparalleled comfort, luxury, and versatility for those seeking unforgettable experiences on the water.

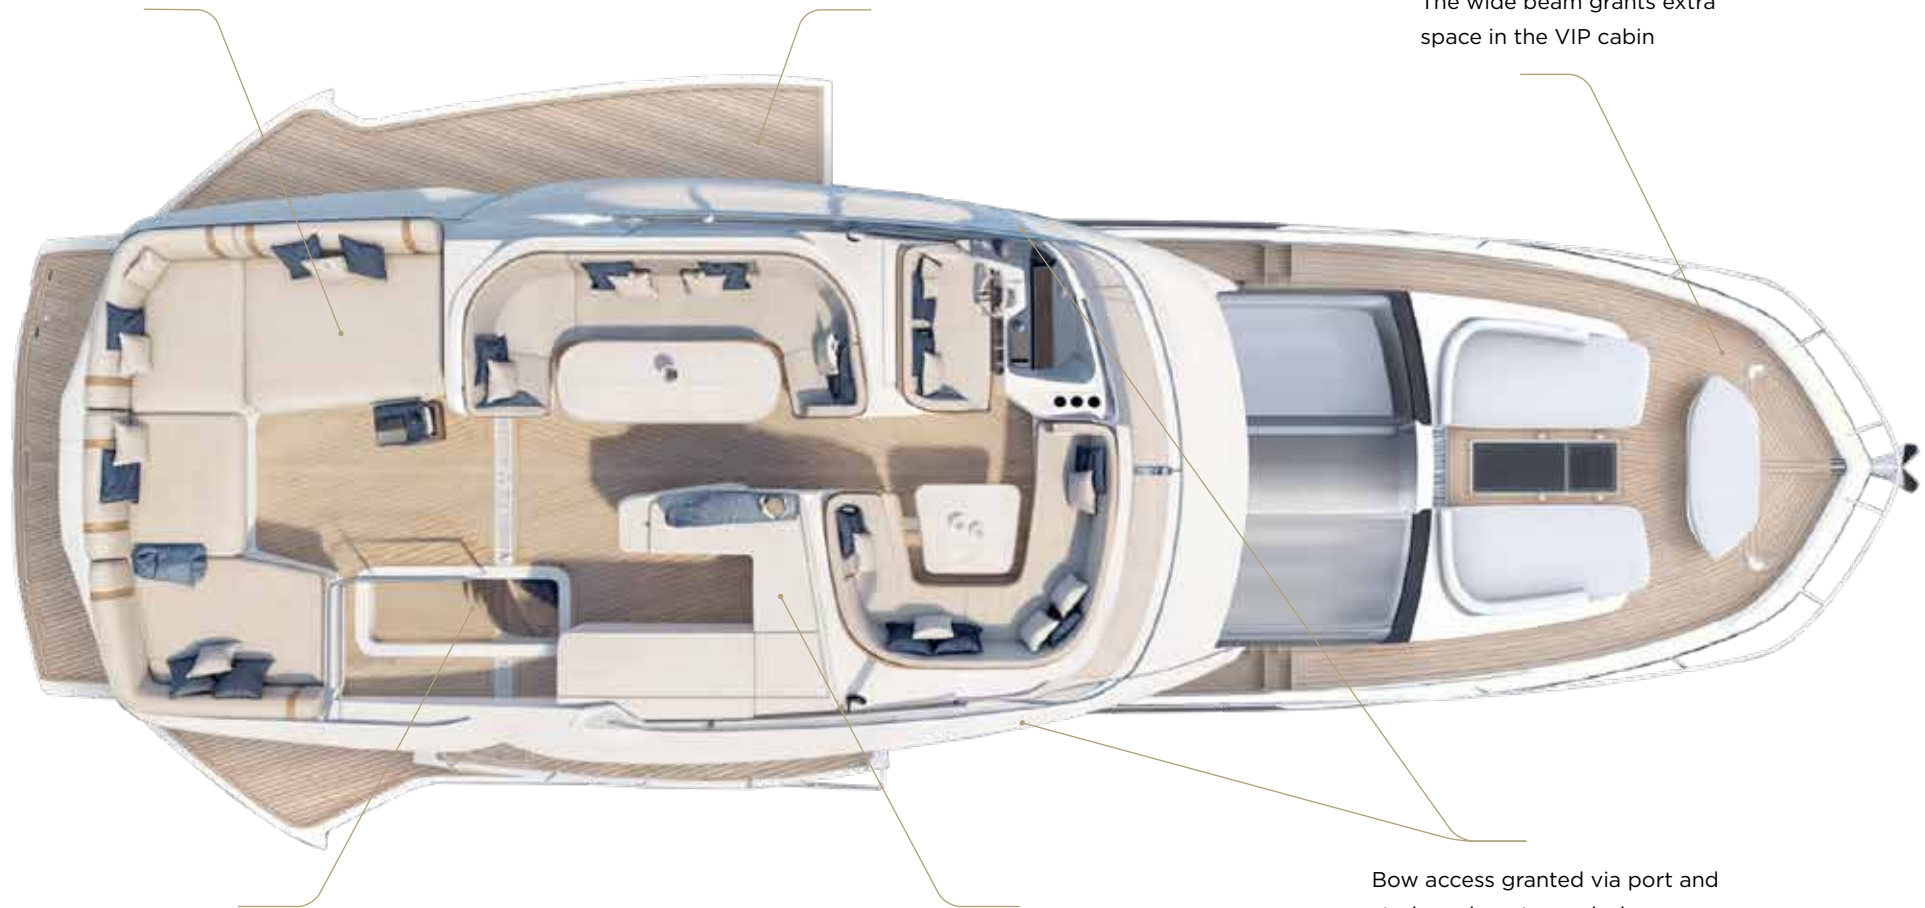

Flybridge

620^{FLY}

Large U-shaped leisure area can be protected by an extendable awning

Both Beach Mode platforms can be shaded by a prop-up canopy

The wide beam grants extra space in the VIP cabin
