HUNTREX 54

Huntrex 54 Fishing Boat

HUNTREX 54 SPECIFICATIONS

LOA	54 FT / 16.4 M
Beam Max	11.8 FT / 3.6 M
Draft Full	0.7 M
Displace Max	12.5 T
Speed max	67 MPH
Hull	Twin Strepped Offshore Endurances Glass
Engines	4x600 / 4x500 R or Yamaha 4x425
Fuel Tank	2100 LTRS Fuel Capacity
Water Tank	300 Litres (60 USG)

Carbon fiber reinforced infused structure using epoxy resins and structural corecell lamination standard equipment

Color Options

Available in a wider range of standard colors, excluding black and metallic finishes while the deck and gunnel are offered exclusively in white or off-white

Front and Canopy Glass

Engineered for the open seas, this design features a curved front and side window glass, ensuring superior wind resistance. Equipped with a high-end water spray system and wiper, it offers clear visibility in any condition

AnchorWinch

The premium anchoring system features a Lofrans or Maxwell stainless steel 20KG anchor, paired with a 20-meter chain and a 50-meter rope, ensuring optimal safety, reliability, and ease of use.

Handrails

Designed for both durability and elegance, all handrails throughout the yacht are crafted from polished stainless steel, ensuring superior corrosion resistance while maintaining a sleek, high-end aesthetic.

Compass

Engineered for precision and safety, the advanced 3* liquid-filled marine compass ensures accurate navigation, providing reliable guidance for a smooth and secure sailing experience.

Decking

A mandatory safety feature, the non-skid decking is engineered to withstand the constant exposure to the harsh marine elements. For enhanced traction and long-lasting protection, the yacht offers the optional SeaDek brand.

Toilet

Featuring a high-quality marine-grade ceramic bowl with freshwater flushing, this yacht toilet is equipped with a black water tank, electric discharge pump, and valve for efficient waste management.

Hull fittings

All hull fittings are of premium, marine-approved quality, engineered to ensure structural integrity, effective water management, and ease of use. Built to endure the harsh marine environment, they guarantee long-lasting durability and reliability.

Cleats and fishing rod holder

The boat is equipped with 10 high-quality stainless steel foldable rod holders, each designed for durability and convenience. Its foldable functionality maximizes deck space and reducing clutter. Each holder is fitted with rubber strakes to securely hold fishing rods in place

Battery charging

The boat is equipped with 10 high-quality stainless steel foldable rod holders, each designed for durability and convenience. Its foldable functionality maximizes deck space and reducing clutter. Each holder is fitted with rubber strakes to securely hold fishing rods in place.

Electrical Circuit Breaker Pane

A 12-volt breaker panel with shore power connection is seamlessly integrated into the console for easy access and efficient power management.

Horn

Marine trumpet-type horn - engineered to deliver a powerful, clear sound that carries over long distances, even in challenging weather conditions.

RC Search Light: LED

The advanced marine lighting system features twin aft spotlights made for superior rear illumination, and four side-mounted spotlights for optimal peripheral vision. Marine remote controlled from the dash this setup ensures seamless operation and navigation, day or night.

Shore Supply

Designed for superior performance, this 50-amp marine socket with an IOM external cable ensures seamless power transfer, enhancing operational efficiency while extending the longevity of onboard electrical systems

Deck lights

Fitted with fourteen LED deck lights that provide crisp, reliable illumination for walkways and twelve ceiling lights, complemented by combination strip lighting, offering a versatile, modern atmosphere-blending functionality with style for an elevated yachting experience.

Exterior canopy

Fitted with fourteen LED deck lights that provide crisp, reliable illumination for walkways and twelve ceiling lights, complemented by combination strip lighting, offering a versatile, modern atmosphere-blending functionality with style for an elevated yachting experience.

Navigation equipment

Fixed with cutting-edge Garmin navigation technology, this system features a 12x16 display screen, complemented by a 63 nm scanner, GSD sounder, and a VHF 100i radio with AIS-ensuring precise, reliable, and seamless navigation in all conditions.

Wiring

All wiring is marine-grade DC, ensuring compliance with world class safety standards

NAV Lights / Anchor lights

Equipped with LED navigation lights, adhering to international standards, ensuring optimal visibility and safety in all maritime conditions

Tank Monitoring

o ensure operational efficiency and enhanced safety, the fuel and water tank gauges are expertly placed at the main helm station and the navigational equipment, providing real-time data for seamless, informed decision-making.

Bilge pump

The yacht is equipped with 2 marine-grade automatic bilge pumps in the aft engine room, along with 3 additional pumps strategically placed throughout the hull. This robust system guarantees reliable water removal, keeping the vessel dry, stable, and safe during every journey

Battery Switch

Marine manual operation type

Electrical outlets

The yacht features 12 2-volt outlets in the console area, 2 in the sitting area, and 2 on the aft deck, power access throughout the vessel.

Toilet and washroom

Manufactured with fiberglass and a non-skid floor, the compact design optimizes space while maintaining superior comfort.

Bait tanks

Installed with 1 high-quality bait tank located on the aft deck for easy access.

External cushions

In accordance with the 3D sketch, all materials are US-stabilized to ensure durability and superior performance

Anti-fouling

Available in white or black, tailored to the customer's preference for a personalized touch.

ADDITIONAL OPTIONS

Gyro (needs additional batteries)

Gyro installation including standard battery upgrade

Complete Lithium battery setup including all smart monitoring and controls
Including inverter and accessories capable of running all the optional accessories

Air con including installation and pumps 6000 btu

Water maker including installation and pumps

Drawer fridges x2

Flir camera M232 • Ice maker

Weather station including cables and interface

Side opening doors including eclectics and mechanism as required

LED RGB lighting controlled by the navigation package
